Department of Applied Chemistry,  
School of Engineering

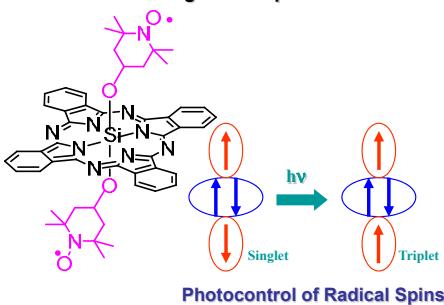

### Functional Metal Complexes Chemistry

## Functionalization of Molecules

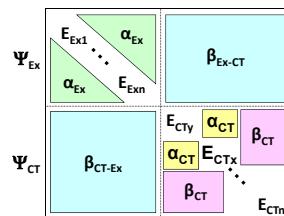

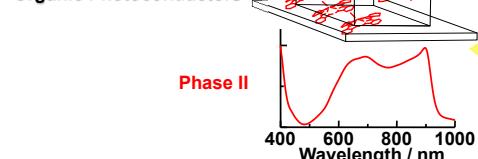

The discovery and elucidation of new electronic structures are important not only for pioneering frontier science but also for developing new functions. Since metal complexes have various electronic structures, coordination chemistry is promising for designing electronic properties. We aim to create novel functions of organic-inorganic hybrid compounds in terms of coordination chemistry, photochemistry, and spin chemistry

### Chemistry of Photofunctional Molecules

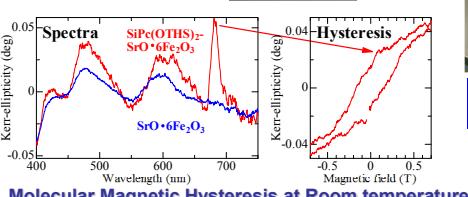

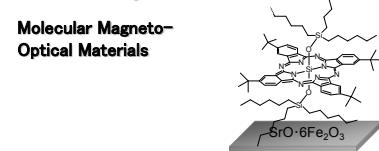

#### Photocontrol of Magnetic Properties

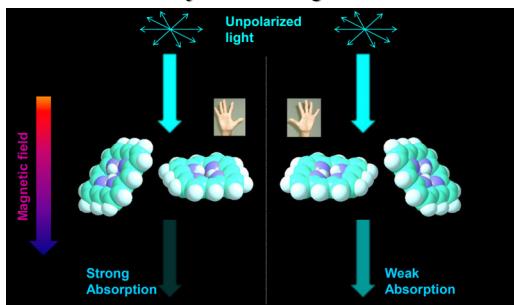

#### Theoretical Calculations of Organic Photoconductors

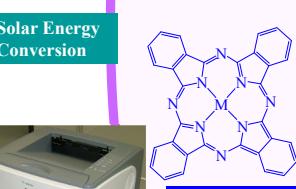

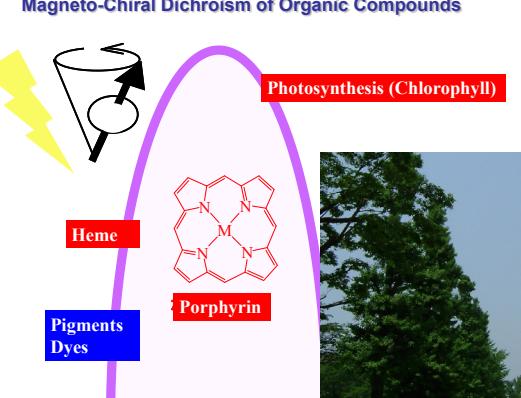

#### Theoretical Calculations of Molecular Crystals

### Homochirality of life : A magnetic answer

### Magneto-Chiral Dichroism of Organic Compounds

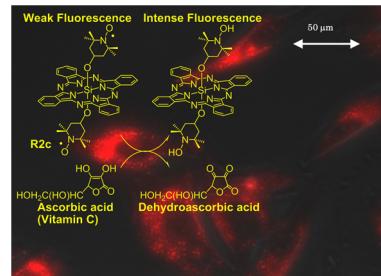

Organic Photocouductor  
(Photocopier)

Catalyst

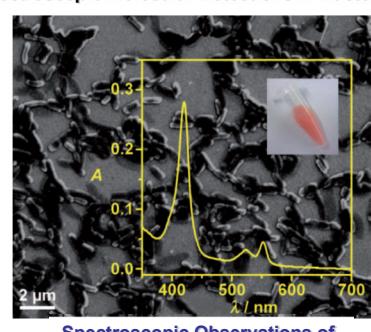

### Chemistry of Biofunctional Molecules

#### Fluorescence Probes

#### Fluorescence Bioimaging of Vitamin C in Cancer Cells

#### Spectroscopic Molecular Detections in Bacteria

#### Photodynamic Cancer Therapy (PDT)
