Architectural Design / Landscape & Culture

Department of Architecture

[Figure the Necessity of the Place]

We, architects, need to find out the way in which architecture can be designed inevitably suitable for stay place.
We show our projects all over the world with the schemes, models, and photos to convey our thought and efforts to attain it.

Projects

New Library
On
The Deep Historical Ground

New building for the General Library of Tokyo University

The site has the historical layers; the early modern, the late modern and temporary period.

The new library has the open space under ground where we can see the sequence of them. This is the way of the 21st century.

Comfortable Space
With
The Energy Saving

The Pilothouse in Sasebo

Living with low energy is attained by being symbiotic with the environment. The house in Sasebo has the comfortable space by making use of the climate there.

New Technology
And
Old Technique

The Library for Indian Industrial University

The new library has been constructed with the new technology of Japan and the indigenous old technique of India. This approach is universal but the way of creation of this architecture is specialized in the place.

Kawazoe Lab was established in 2011, and now is consisted by architects, researchers and graduate students. Each person has different skills, knowledge and experiences so that we can argue well to make better future of architecture and the precious scenery.
