Problems of disaster responses

Who is BOSS ?

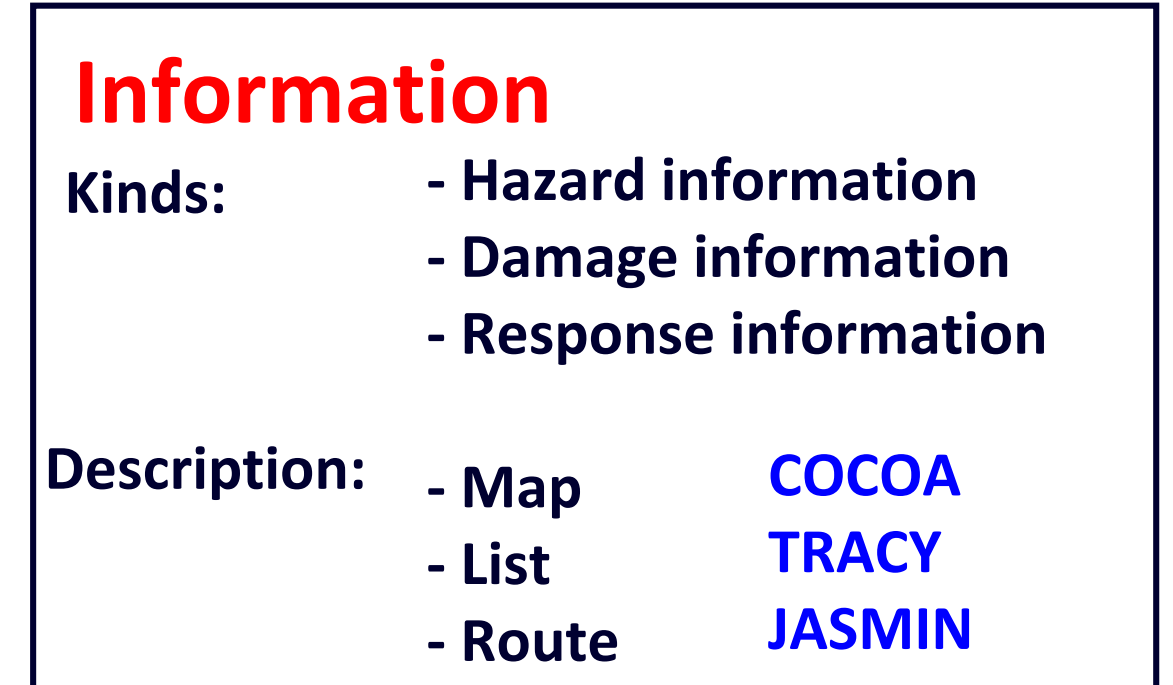

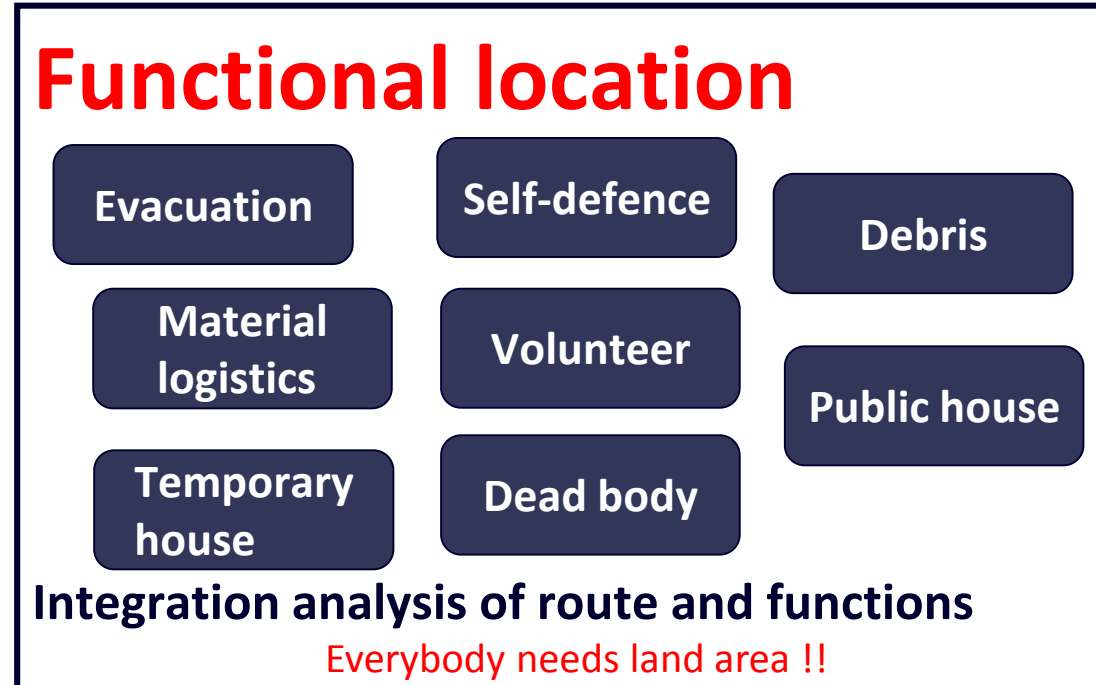

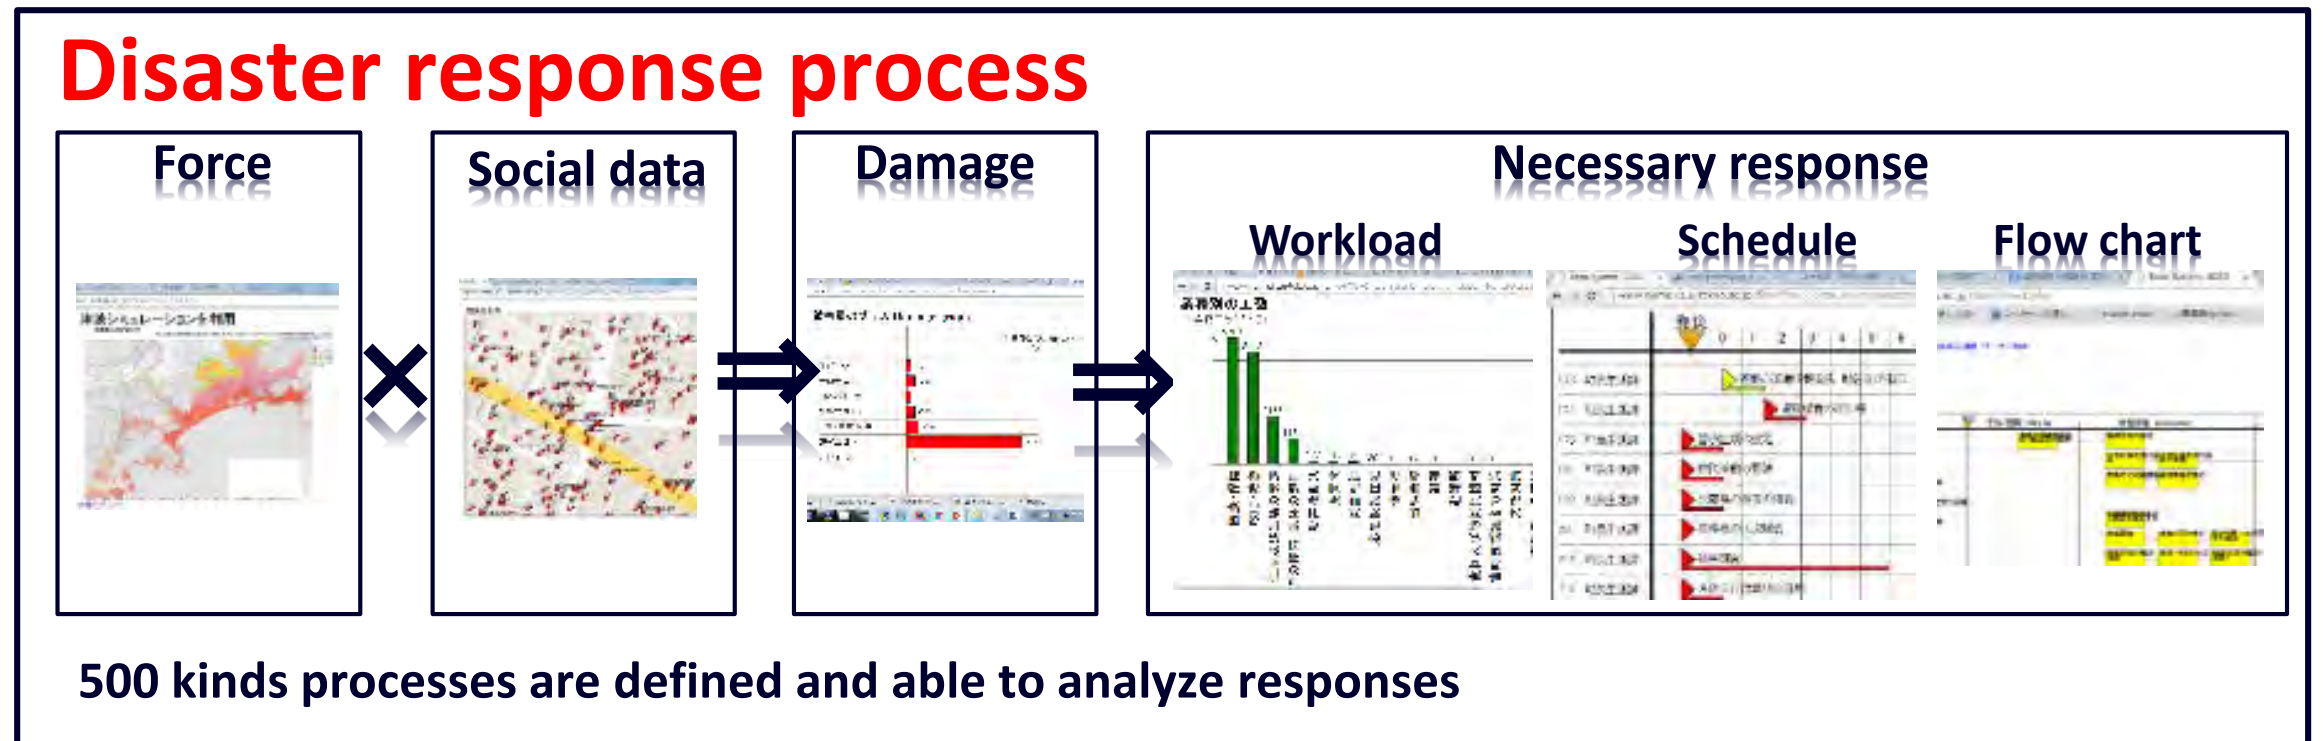

Disaster response support system: BOSS

Process * Information * Functional layout

⇒ Effective responses

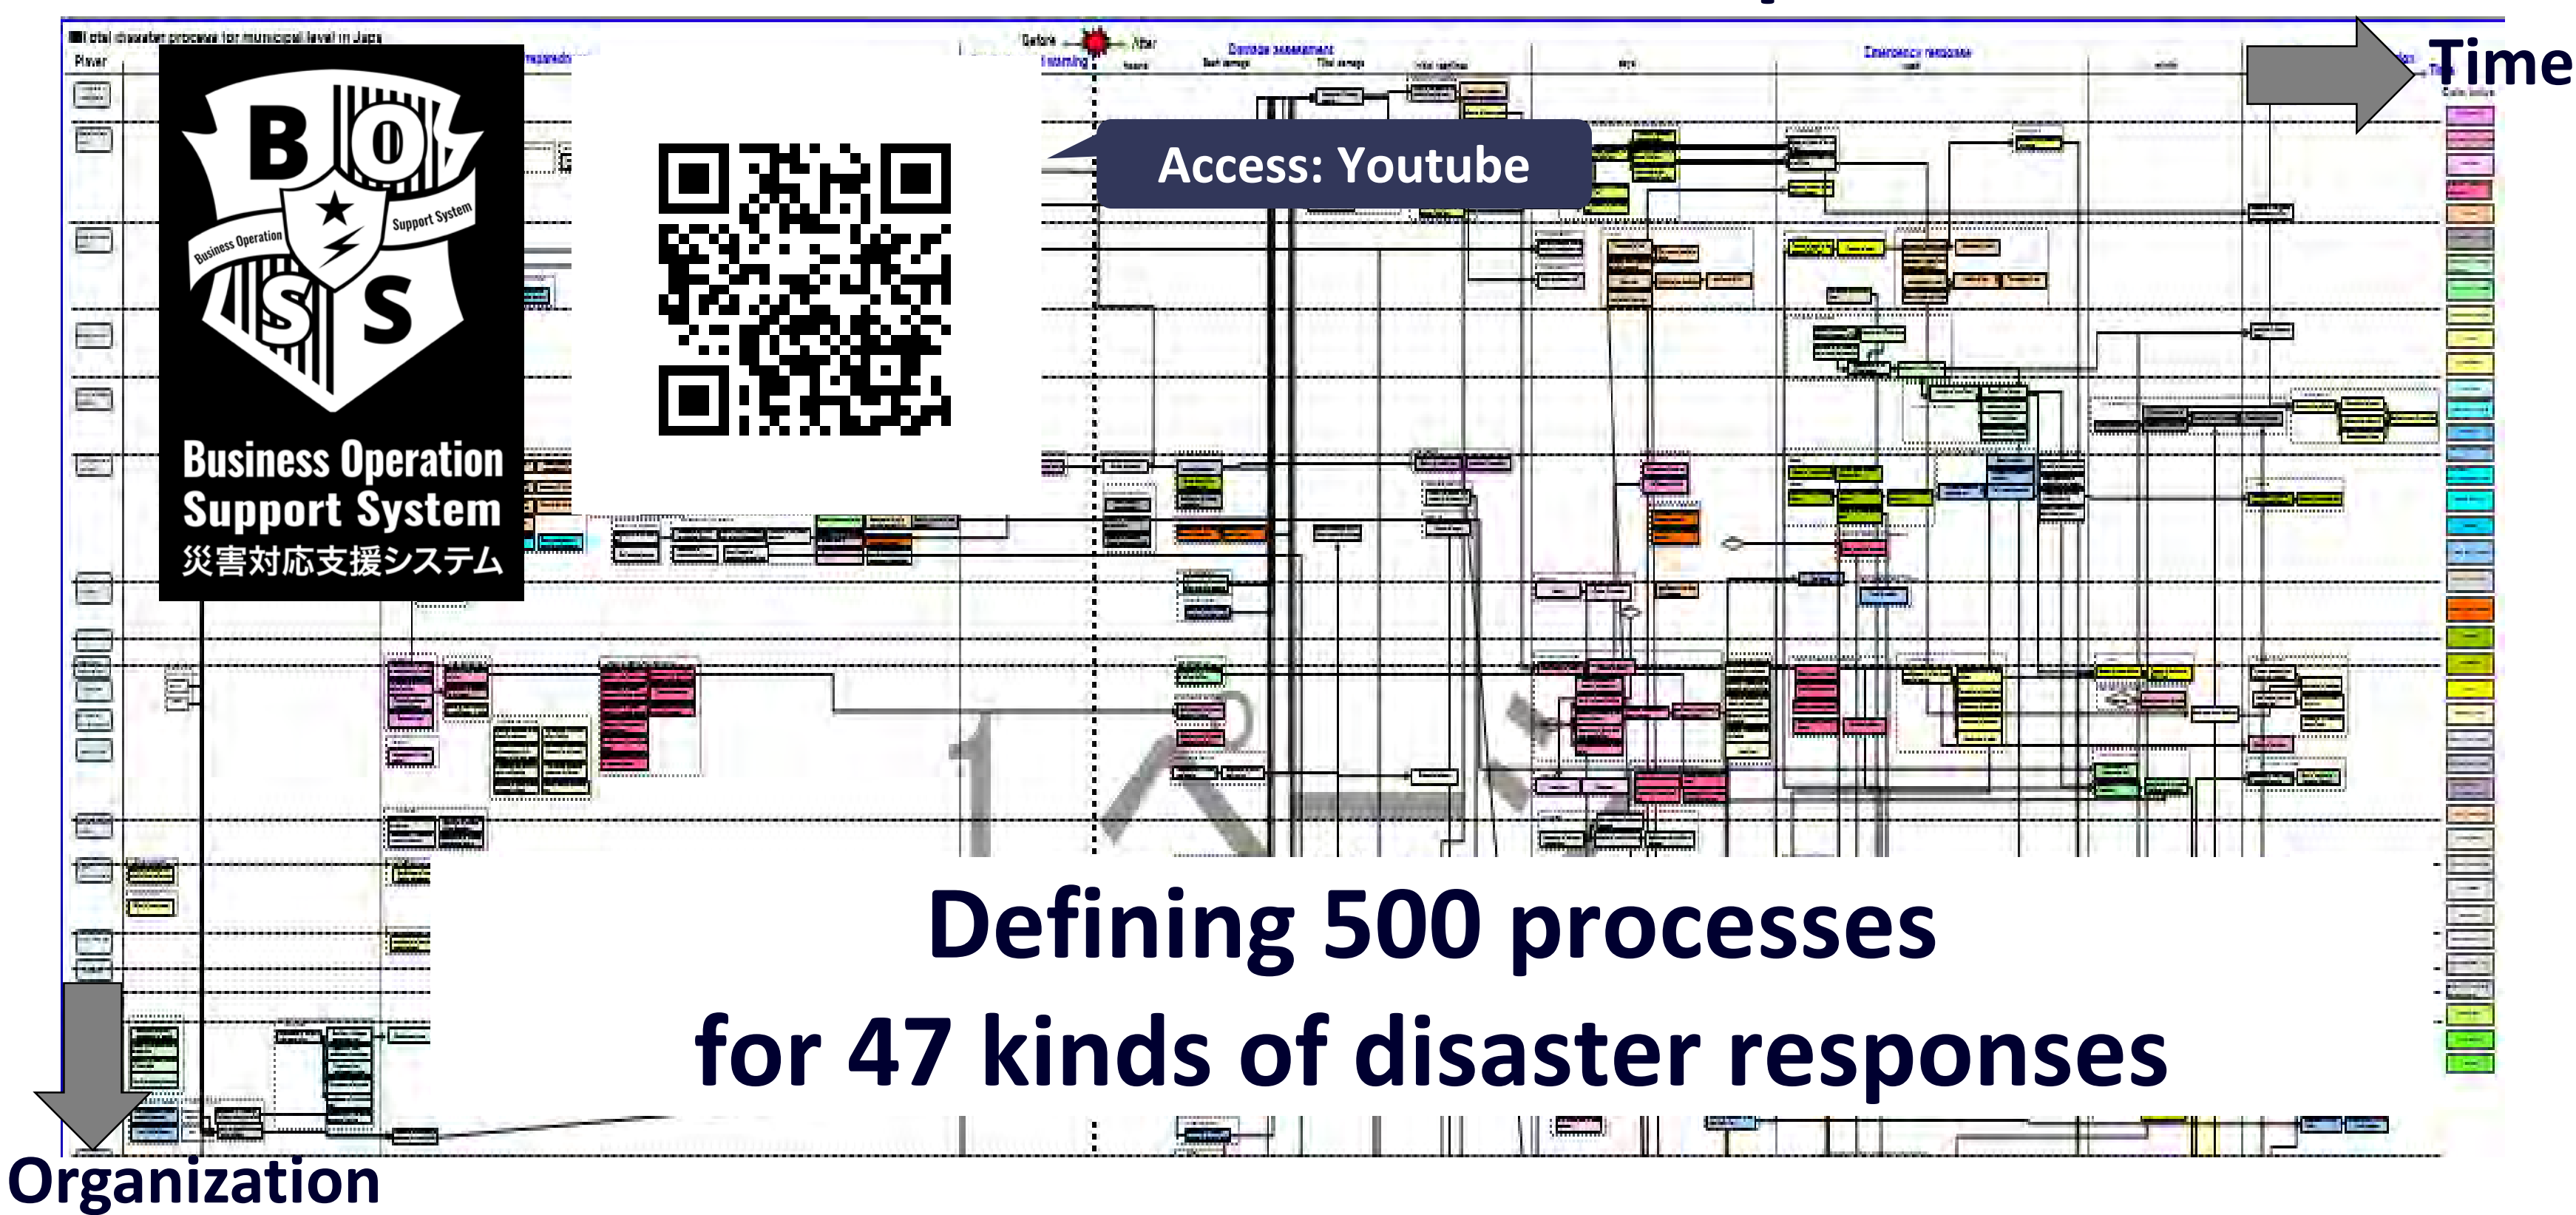

Few members can design the total disaster response processes

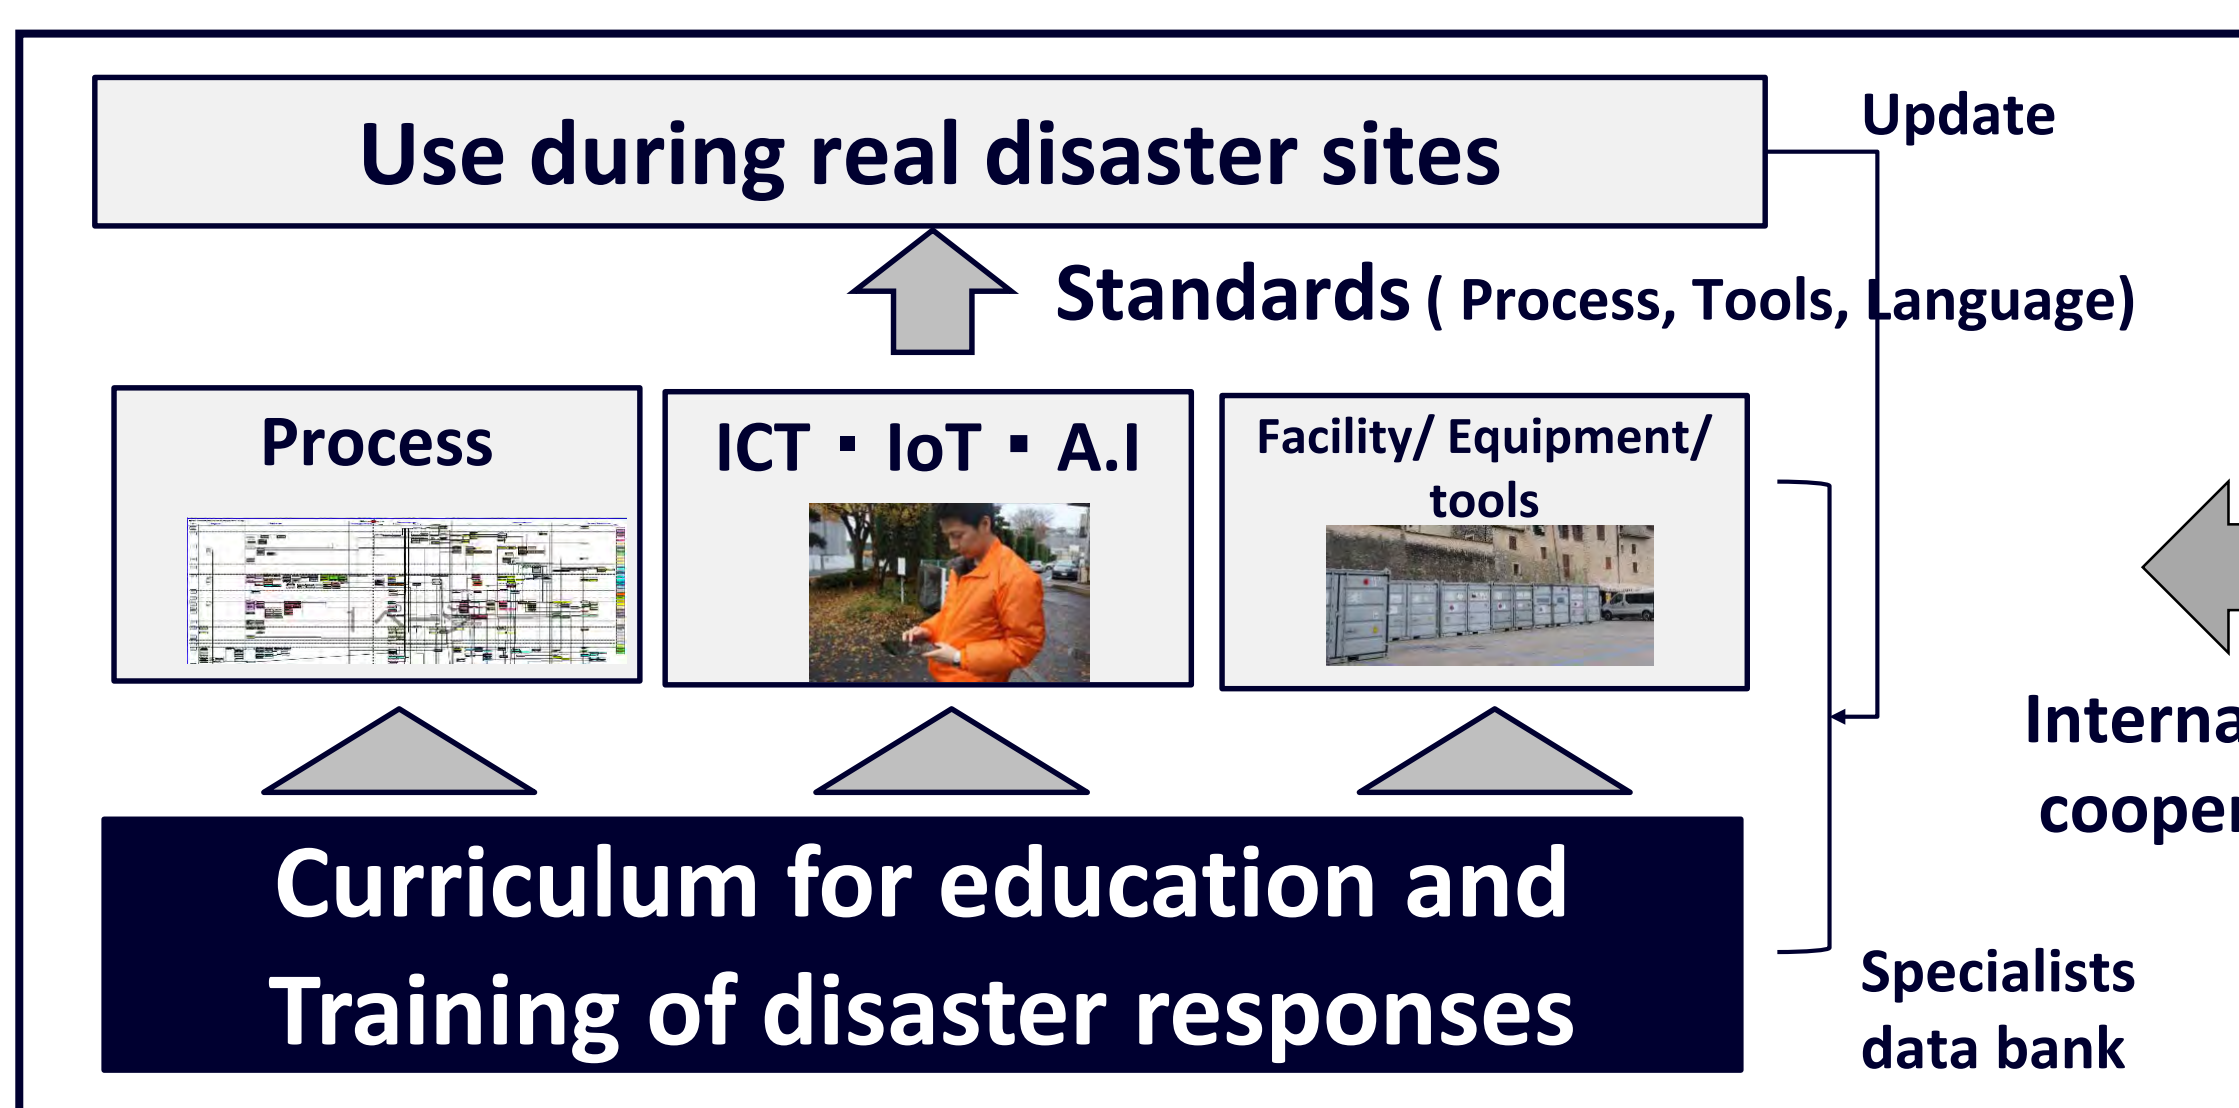

Characteristics of BOSS: Standard of processes

47 kinds of disaster responses

Design of disaster response Training center

Mission
Contribution of disaster mitigation and reduction by Systematic education and real training

Purpose
(1) Acquire the ability to design the total disaster response processes
(2) Have the confidence for disaster responses

Program
Provide the program to have Understand, Design, Confidence for the people

This research is supported by the Foundation for the Promotion of Industrial Science of IIS.
