Department of Human and Social Systems

Public Engagement

<http://cardgame.iis.u-tokyo.ac.jp>

Our Mission

- 1) To develop science communication methods that foster and extract the citizens' knowledge.
- 2) To deliver unidentified issues, directions for solving issues considered from various perspectives, and ideas for innovation to researchers.
- 3) To contribute to public participation in engineering toward "engineering that leaves no one behind" and "engineering that provides solutions that society truly desires".

Examples of Methods

"Secret Research Gadget":

Interactive science communication tool in the form of a card game

Philosophical Dialogue X Science Communication:

Dialogue to deepen understanding and thinking through a series of questions
