LIMMS: A joint laboratory between France and Japan

LIMMS is a joint research unit, between the Institute of Engineering and Systems Science of CNRS and IIS, established in 1995. LIMMS welcomes CNRS researchers, post doctoral fellows supported by JSPS and CNRS, PhD and internship students. Since 1995, more than 280 researchers were hosted. Since 2011 to 2016, LIMMS and his EUJO-LIMMS extension became the European Commission's first international laboratory in Japan. In June 2014, SMMIL-E laboratory as a mirror site of LIMMS was launched in Lille. In 2016 a joint Hospital University project, iLite, on liver bioengineering innovation was started with Paul Brousse hospital in Villejuif. A Core-to-Core project was also granted by JSPS (2018-2025) to LIMMS promoting collaboration in BioMEMS.
