### Quantum nanophysics and its device applications

Various intriguing physics shows up in quantum nanostructures owing to size quantization and electron-electron interaction effects. We investigate novel physics in such quantum nanostructures and explore their device applications.

- Carrier dynamics and device applications of quantum nanostructures in the THz range
- Nanoscience for single molecular transistors
- Novel high-sensitivity, fast terahertz detectors using MEMS resonators
- Thermionic cooling effect in semiconductor heterostructures

Bloch oscillation in semiconductor superlattices and its application to THz oscillators
