

DLX Design Lab

Creating Value Through Design

Design-Led X platform

Design-Led X platform

<https://www.designlab.ac/>

As part of the Design-Led X Platform the international and interdisciplinary DLX Design Lab's mission is to create VALUE through DESIGN. That value can come from creating product or service ideas (what we call deployable innovations); or disseminating knowledge to or engaging with the general public; or helping researchers to imagine their work's impact on society and find new directions for exploration.

**Research
Dissemination**

**Material
Exploration**

**Future Mobility
Creation**

**Sustainability
Promotion**

Everything the DLX Design Lab carries out is in COLLABORATION with others. We partner on projects with research labs in The University of Tokyo and also with teams from our international partners listed below.

Royal College of Art
Postgraduate Art and Design
