**Research and Developments on ITS**

### Various Traffic Simulation Models (TS)

Traffic simulators (TS) of various scales developed, to evaluate political options with high accuracy.

- **SOUND** : A network traffic simulator, covering a wide network including expressways, while vehicles are considered individually.
- **AVENUE** : A street-level traffic simulator, based on the detailed maneuvers of individual vehicles, such as lane changing at an intersection. Used for evaluating traffic operation strategies, reducing congestion on streets, etc.
- **KAKUMO** : A micro traffic simulator, connecting TS and DS. It fills the gap of spatiotemporal resolution between TS and DS by calculating driver’s behavior and vehicle dynamics of hundreds of vehicles around the test driver in DS. Simultaneously, the behavior of the test driver in DS is reflected to TS, and then the movements of surrounding vehicles and the traffic condition change interactively.

### Sensing Vehicles

Sensing vehicles are developed for collecting various real-world data while running on the field.

### Societal implementation of automated driving

Automated Driving emerging scenario proposal and the Impact Analysis

- **Masiero II** can measure location, speed, acceleration, and direction of the experimental vehicle itself with relative positioning of the following vehicle, which is applied for analyzing behaviors of vehicles and drivers under various traffic conditions.

### ITS Seminar

Series of seminars organized about three times a year, and ITS based on needs from local areas as well as central administration promoted

### Lectures

Not only lectures for students but also a special lecture “UMobi Forum” (once a year) for private sectors organized for developing human resource in ITS industry

### Research Committee

Informal discussions about latest ITS topics hosted every month inviting speakers from academia, industry, and government

### Human Resource Development and Social Return Activities

- **ITS Seminar**
- **Lectures**
- **Research Committee**

### Global Collaboration

- ITS Center hosts an international symposium every year and exchanges faculty members and students with other universities and institutes through international collaboration as well as domestic collaboration.
