

Research Program of Nikon Chair of Imaging Science

[Bridging between Industry and University]

Industrial Optics

<http://www.optics.iis.u-tokyo.ac.jp/>

In the field of optical science and engineering, it is said that there is a deep gap between that in the universities and industrial companies. This chair offers students the education directly connected to the cutting-edge optical technology in industry and give opportunities to exchange the information between leading scientists and engineers. The aim of this chair is to maintain international competitiveness of the optical industry in Japan through these activities. At the same time, this chair is actively engaged in outreach activities for elementary, junior high and high school students.

【ACTIVITIES】

Lecture "Advanced Optical Engineering" of the
Department of Applied Physics, School of Engineering

Lecture and Training at the Consortium on Education and
Research on Advanced Laser Science (CORAL)

Science School for Elementary and Junior High School
Students at Komaba Research Campus Open House

ONG Event "Traveling Lecture"
at Saitama Prefectural High School

Workshop for exchange of university and company researchers "Lab Changes, Change with VR"
