We pursue the reutilization of building information produced through the process of design and construction.

1 | BIM Steering Force
- Recapturing cooperative collaboration process in large-scale design-build projects.
- Redefining the BIM/CAD talent in Japanese architecture and construction ecosystem.

2 | BIM Gamification
- Discovering the potential use of video-game-originated methodologies to leverage the building information further for local communities.

3 | BIM for Heritage (HBIM)
- Restoring the demolished / unbuilt project digitally.
- Building models to be publicly shared as open data.

4 | BIM, CDE & IPR
- Identifying IPR problems in digital environment including the metaverse.
