

# Center for Research on Innovative Simulation Software

[Research and Development of Large-Scale Simulation used in Industry]

<http://www.ciss.iis.u-tokyo.ac.jp>

## Aiming Innovation in MO-NO-DU-KU-RI

### High performance simulation software drastically changes engineering

Center for Research on Innovative Simulation Software (CISS) was found to conduct R&D on the advanced and practical computational science simulation software utilizing hyper-large-scale simulations represented by "Kei" for the next hyper-simulation era. We aim at

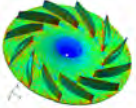

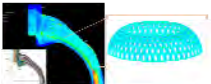

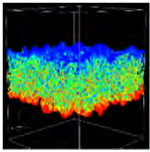

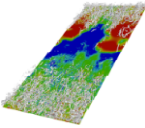

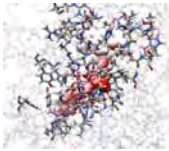

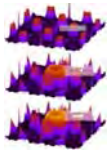

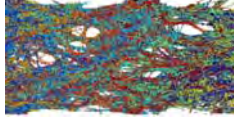

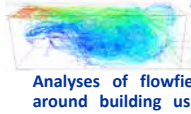

- ◆ Conducting world-leading advanced research on hyper-large-scale simulation software
- ◆ Strengthening the educational foundation to educate how to make and use hyper-simulation software for industrial application
- ◆ Putting R&D results in common industrial use to enhance global competitiveness of domestic engineering

### Introduction of the Research

Manufacturing	Design of Molecular and Nanoscale Materials and Devices	Medical engineering and Environmental Building Science
 <p><b>C. Kato</b> Absolute vorticity in a centrifugal blower</p>  <p><b>N. Yoshikawa</b> Developing hydrogen tank by multiple filament winding method supported by meso-scale simulation</p>  <p><b>F. Hamba</b> Contours of kinetic energy of turbulent diffusion in rotating system. Red denotes right-handed helical motion and blue denotes left-handed helical motion.</p>  <p><b>Y. Hasegawa</b> Instantaneous turbulent flow over a flat plate under optimal control for heat transfer enhancement and friction drag suppression.</p>	 <p><b>F. Sato</b> Electrostatic potential on the flavin adenine dinucleotide in glucose oxidase</p>  <p><b>T. Mizoguchi</b> Wave function at the bottom of the conduction band of MgO at (top) ground state, (middle) core-hole state at Mg2p orbital, and (bottom) core-hole state at Mg1s</p>  <p><b>Y. Umeno</b> Deformation of Polycarbonate by Coarse-Grained Particle Model Simulation</p>	 <p><b>M. Oshima</b> Schematic of integrated simulation system "M-SPhyR Circulation" (Multi-scale and physics simulator for circulation)</p>  <p><b>R. Ooka</b> Analyses of flowfield in and around building using Lattice Boltzmann Method</p>  <p><b>K. Nagai</b> Failure of RC beam-column joint by RBSM</p>
Large-Scale Data Analysis		
 <p><b>K. Ono</b> Web-based workflow system WHEEL</p>		

### Major National Project being Promoted by CISS

#### Priority Issue ⑧ on Post-K Computer:

#### Development of Innovative Design and Production Processes that Lead the Way for the Manufacturing Industry in the Near Future (2014-2019)

- Overview: Research and develop innovative design techniques, new manufacturing processes that minimize costs, and ultrahigh-speed integration simulations, which will form the core of these efforts, to achieve high value-added product development
- Responsible organization: The Univ. of Tokyo; Kobe Univ.; Tohoku Univ.; Yamanashi Univ.; Kyushu Univ.; Tokyo Univ. of Sci.; JAXA; RIKEN

Leading Institute
