Pedestrian Network in Shibuya Station Area

The evaluation method of TOD has been designed. As a part of that, traffic evaluation on pedestrian network has been executed. By evaluating before and after the redevelopment around Shibuya Station, which is a good example of TOD, the traffic changes can be observed.

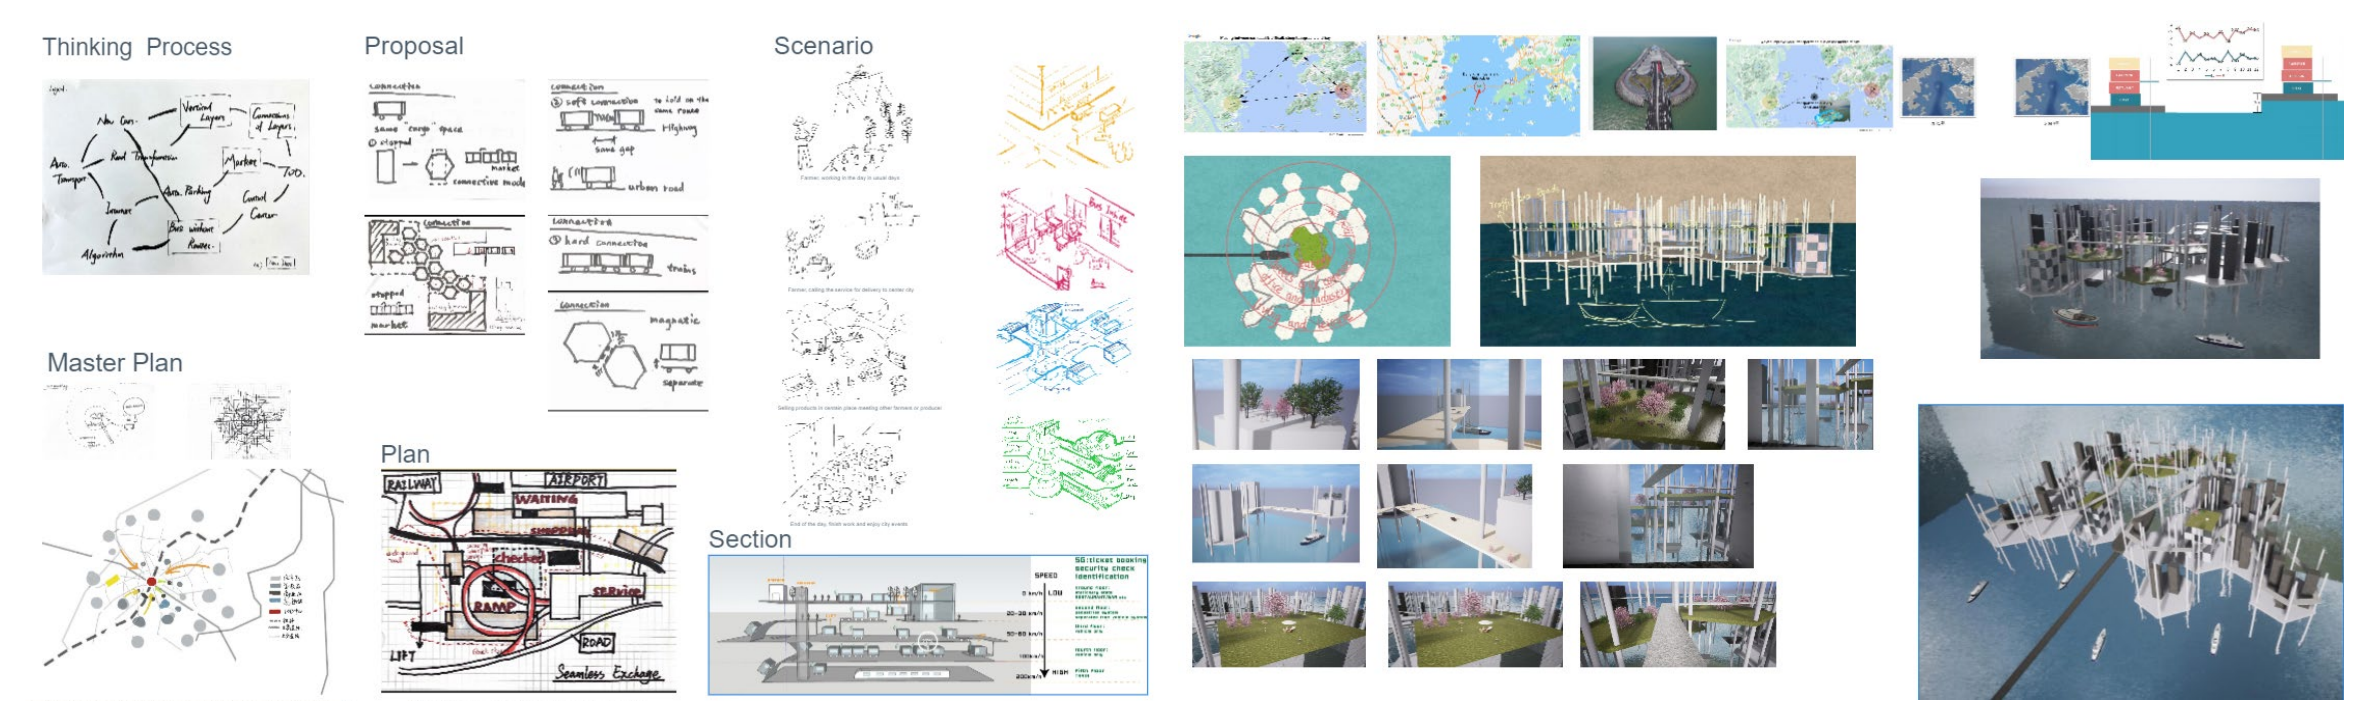

Workshop on the Theme of「TOD」

keyword co-occurrence of TOD research in English

Extracting keyword related 「TOD」 in English research papers, and what keywords are of deeply related to TOD is visualized in this figure. By extracting keywords in chronological order, keywords with high social interest in each era emerge.

The figure shows the result of workshop with Sichuan University, students worked on planning cities with various types of transportation under the vision of a near-future city , and finally presented practical proposals on the potential of TOD.
